

VSCode & GitHub Repository Setup Guide

Creating "Unit0-Python-Basics" Project

Prerequisites

- VSCode installed on your computer
- Git installed on your system
- GitHub account created

Step 1: Create and Open Folder in VSCode

1. Navigate to your `Period1-CS100` folder on your computer
2. Inside `Period1-CS100`, create a new folder named `Unit0-Python-Basics`
3. Open VSCode
4. Go to **File** → **Open Folder**
5. Navigate to `Period1-CS100/Unit0-Python-Basics` and select it
6. Click **Select Folder** (or **Open** on Mac)

Step 2: Initialize Git Repository

1. Open the integrated terminal in VSCode:
 - Go to **Terminal** → **New Terminal**
2. Initialize a new Git repository:

```
git init
```

3. Create a README file:

```
echo "# Unit0-Python-Basics" > README.md
```

Step 3: Make Your First Commit

1. Add your files to Git:

```
git add .
```

2. Make your first commit:

```
git commit -m "Initial commit"
```

Step 4: Create GitHub Repository

1. Go to [GitHub.com](https://github.com)
2. Click the **+** icon in the top-right corner
3. Select **New repository**
4. Repository name: `Unit0-Python-Basics`
5. Choose **Public** or **Private**
6. **Do NOT** check any boxes (README, .gitignore, license)
7. Click **Create repository**

Step 5: Connect to GitHub

1. Copy the repository URL from GitHub (it will look like:
`https://github.com/YOUR_USERNAME/Unit0-Python-Basics.git`)
2. In your VSCode terminal, connect your local folder to GitHub:

```
git remote add origin https://github.com/YOUR_USERNAME/Unit0-Python-Basics.git
```

3. Push your files to GitHub:

```
git branch -M main  
git push -u origin main
```

Step 6: Verify Everything Works

1. Refresh your GitHub repository page - you should see your README file
2. In VSCode, you should see Git information in the bottom status bar

Basic Commands You'll Use Often

```
# Save your work to GitHub  
git add .  
git commit -m "Describe what you changed"  
git push
```

Your Folder Structure

```
Period1-CS100/  
└─ Unit0-Python-Basics/  
   └─ README.md
```

You're ready to start coding! Create Python files in your `Unit0-Python-Basics` folder and use the basic Git commands above to save your progress to GitHub.
